Agenda

B2B Primary Distribution

D2C Streaming

Personalized Ad Insertion

Edge Delivery

Our Milestones

1988
News DataCom (NDC) founded in partnership with News Corporation—renamed **NDS** in 1992

1994
NDS delivers world's first digital DTH system to DIRECTV with its flagship product, **VideoGuard,** a smart-card based security system

1999
NDS begins trading as a public company on the NASDAQ stock exchange

2001
NDS launches **world's first fully integrated DVR with BSkyB**

2005
Cisco acquires Scientific Atlanta

2009
Permira buys the public holding in NDS turning it into a privately held company

2018
Cisco completes sale of its SPVSS Unit to Permira. New company launches as **Synamedia**

2021
Synamedia acquires **ContentArmor** to strengthen its video security portfolio with edge and 5G watermarking

2022
Synamedia acquires **Quortex** to add just-in-time live video streaming and accelerate its SaaS offerings

80s	90s	00s	10s	20s

1998
NDS delivers 1st digital conditional access system to **BSkyB**

2002
Scientific Atlanta, a global provider of set-top boxes, end-to-end video distribution networks and video systems integration, acquires **BarcoNet NV**, a provider of distribution solutions for broadband cable, terrestrial, telecom, satellite, and wireless applications

2012
Cisco acquires NDS from Permira to integrate the Service Provider Video Software Solutions Unit

2019
Sky takes a stake in the business, joining majority shareholder Permira

2022
Synamedia acquires **Utelly** to boost Synamedia Go's content discovery capabilities

VN Customer Market Segmentation

Our portfolio covers a broad range of customers

Broadcasters

Traditionally distributes Linear TV B2B

- Broadcasters
- Content Providers
- Managed Service Providers

- Discovery
- ESPN
- NBC
- Arqiva

PayTV

Delivers Linear TV and OTT Services to Viewers

- PayTV satellite
- PayTV telco
- PayTV cable
- PayTV streaming

- Charter
- Comcast
- Dish
- Yes

Content / Rights Owners

Create & Own Content

- Sports rights holder
- Sports team / franchise owner
- Non-sports content owner
- eSports owner

- NFL
- Formula 1
- NBA
- FIFA
- New York Yankees
- Real Madrid
- BBC
- Disney

OTT Operators

**Streams Content to Viewers over the Internet**

- Content/Right owners going D2C
- Broadcasters going D2C
- Native OTT aggregator/operators

- Max
- ESPN+
- Peacock
- FIFA+
- Apple TV
- Hulu
- Netflix
- DAZN

Streaming is the primary way the world watches television

VN Key Customer & Market Trends
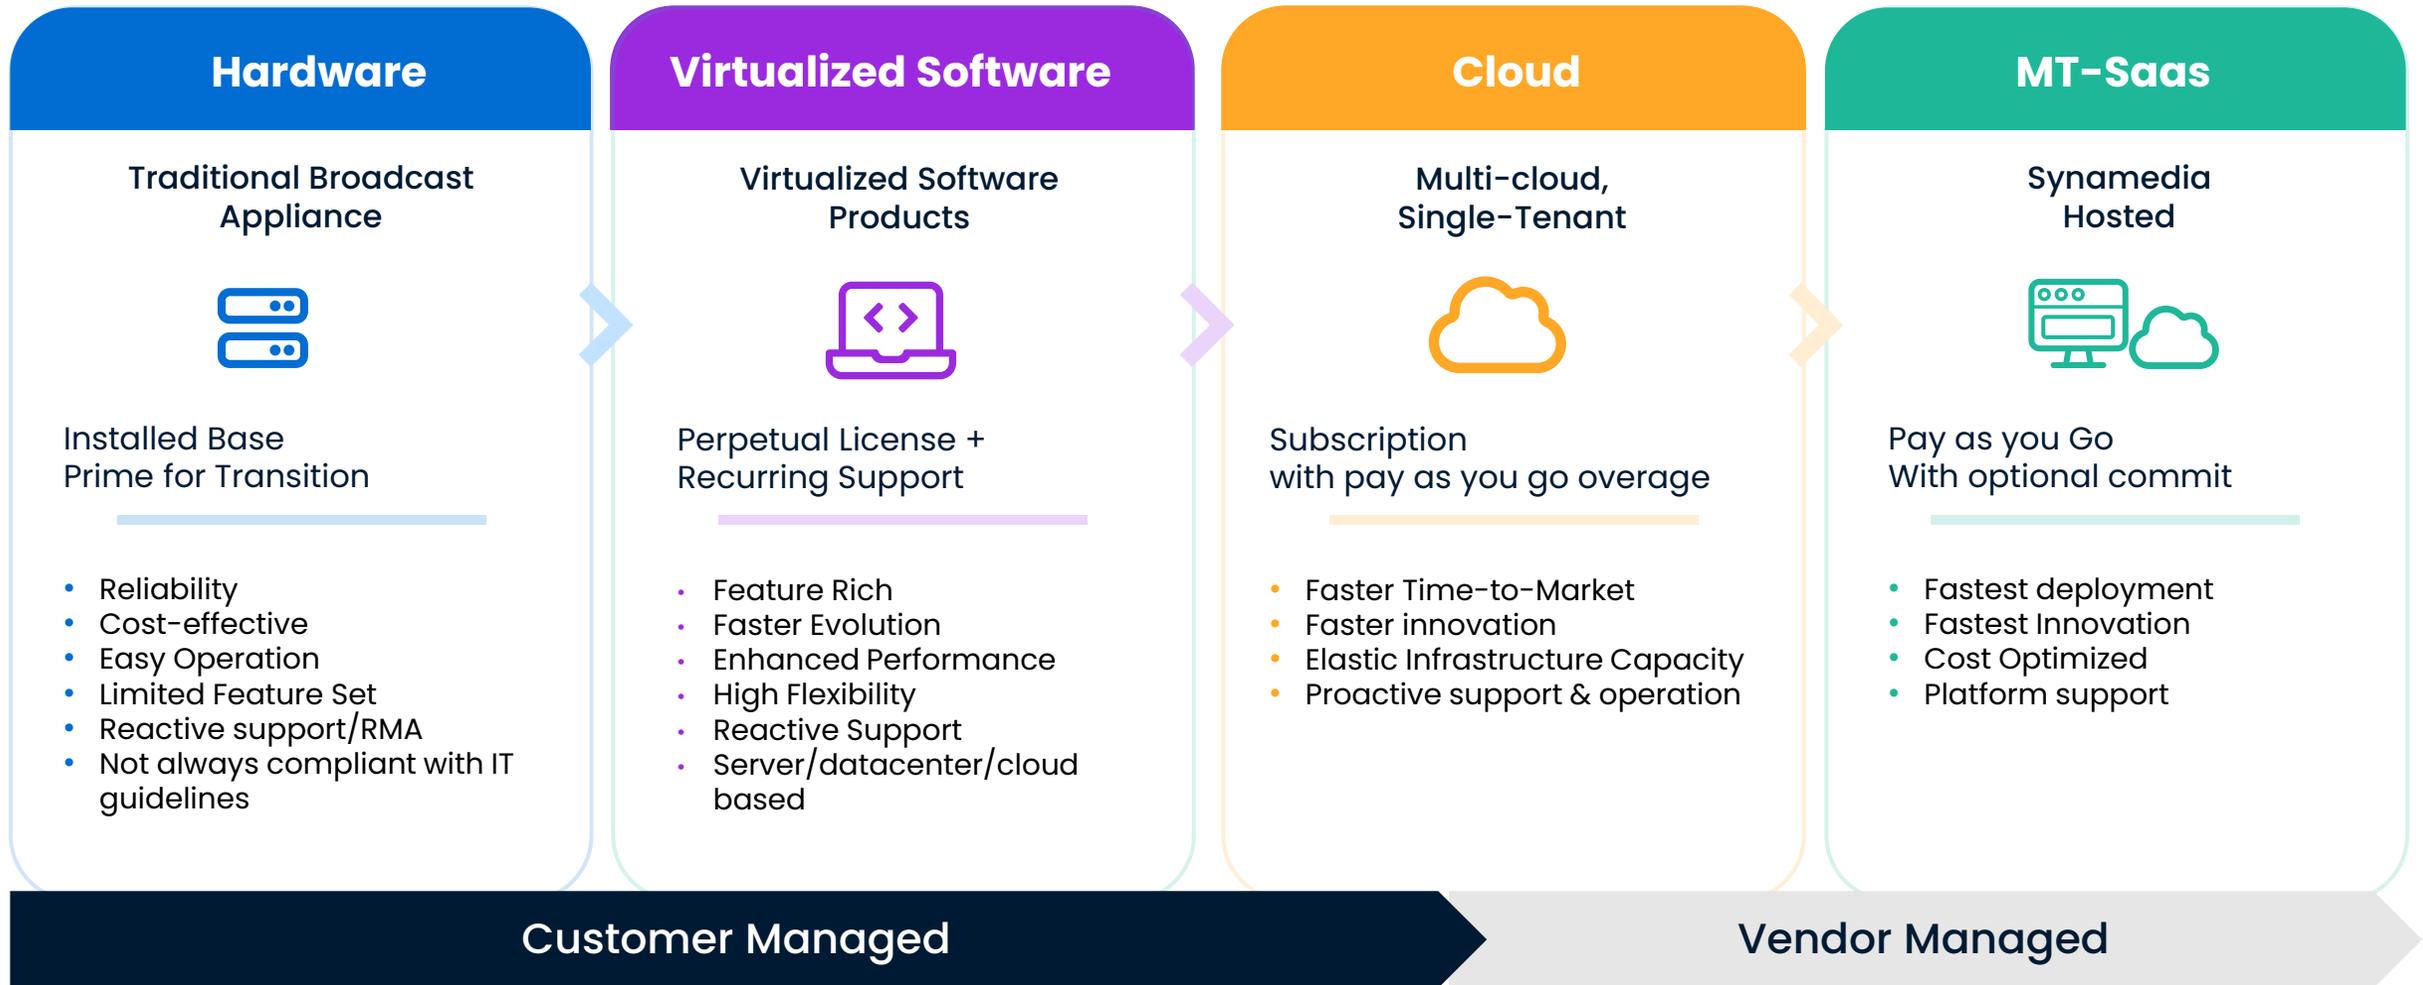

What... are our customers investing in?

Content	B2B Distribution	D2C Streaming	Edge Delivery	Consumer

Broadcast

Broadcaster migrate Primary Distribution off satellite to IP, Cloud & CDN

PayTV migration of processing from on-prem head-ends to Cloud & Software subscriptions

payTV Cable migrating to IP delivery & storage of user content in their network

Streaming

Broadcasters distribute content in ABR for advanced regionalization and ad insertion

Content/Rights Owners and **Broadcasters** also become **OTT Operators** for at scale and low latency delivery with ad revenue, in particular for live sports

IP Streaming at scale requires **payTV** operator edge CDN to extend public CDNs. Ad insertion plays an increasing role at the edge
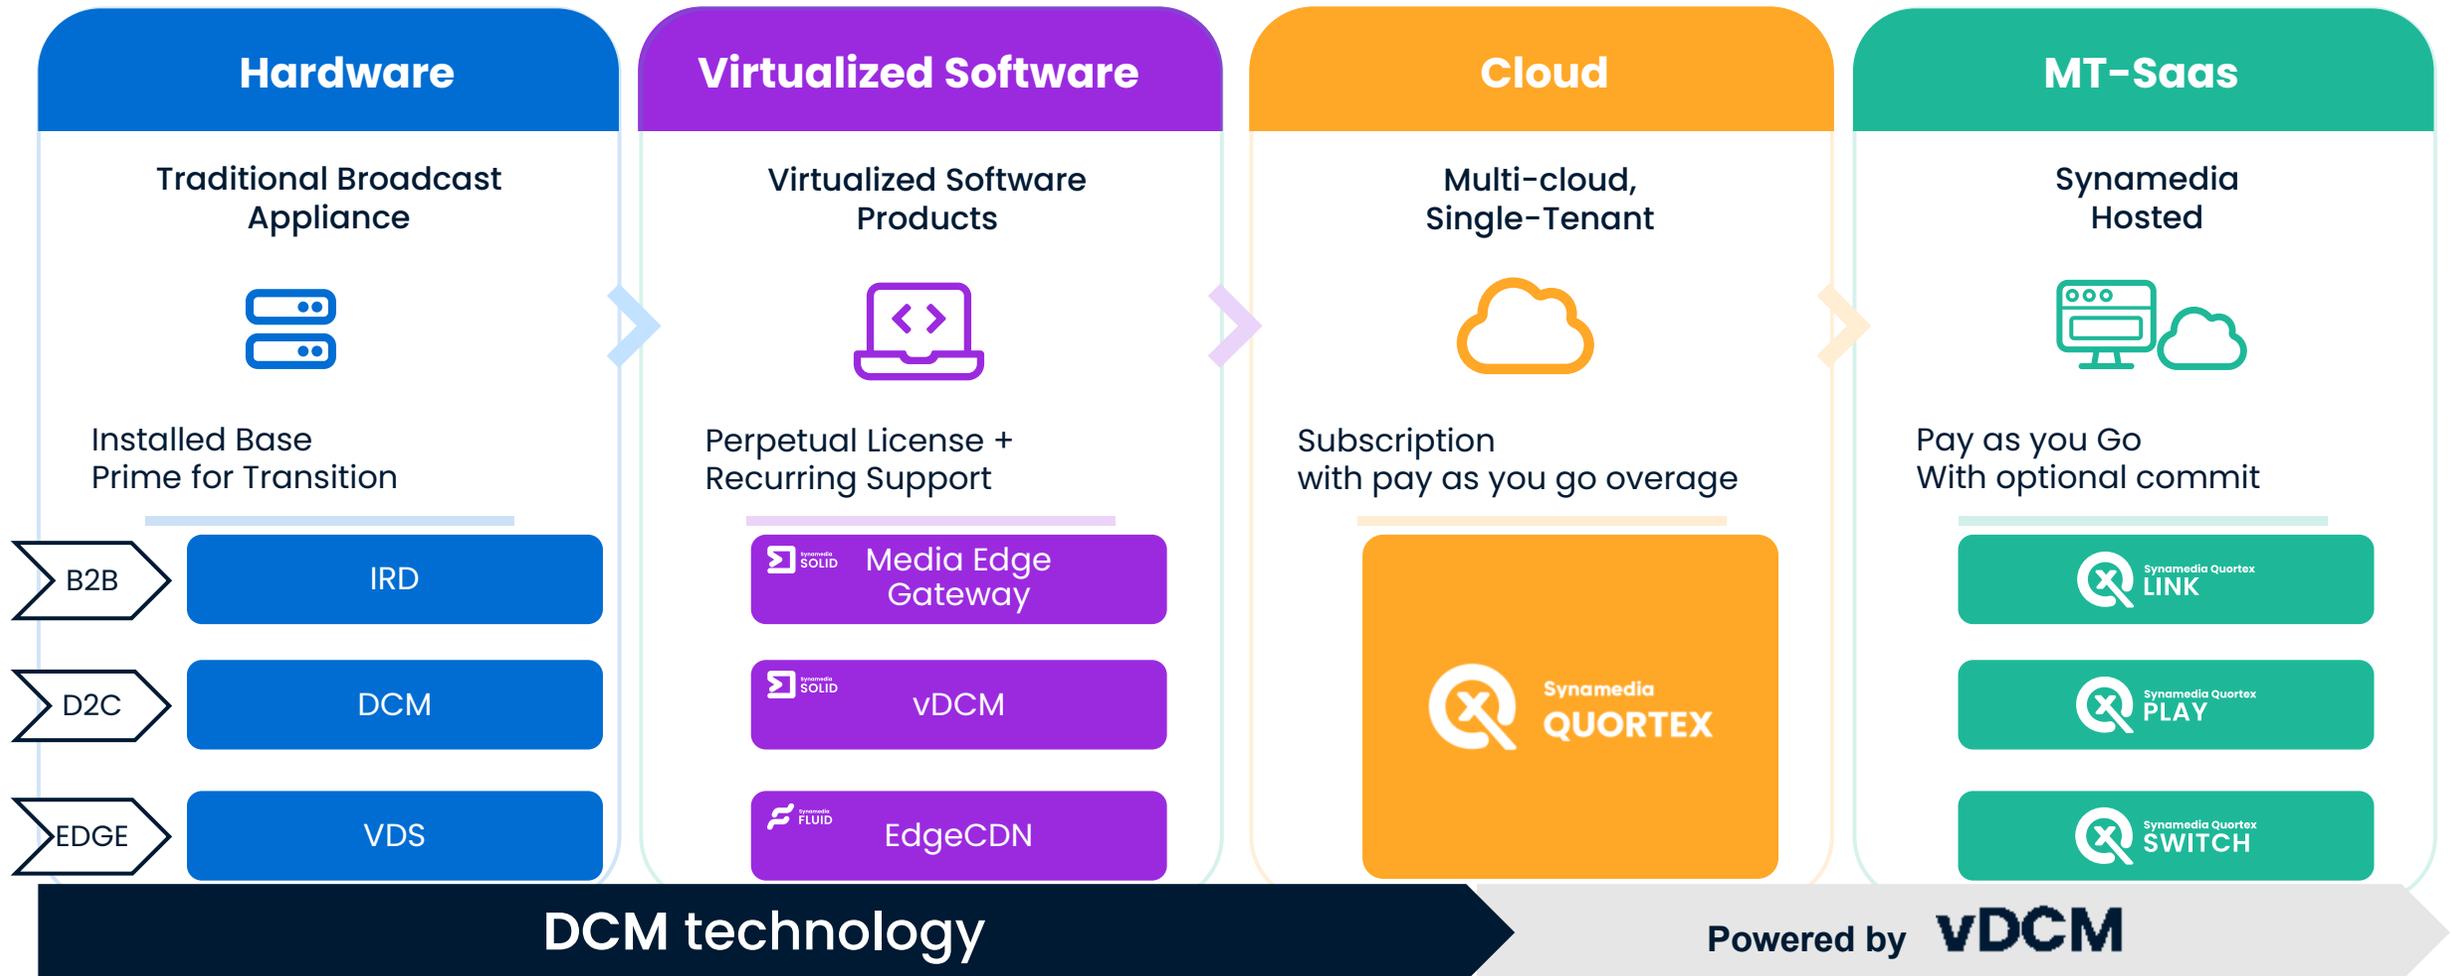

The Case for Quortex

The market shift and why Quortex matters

We are the cloud transition company
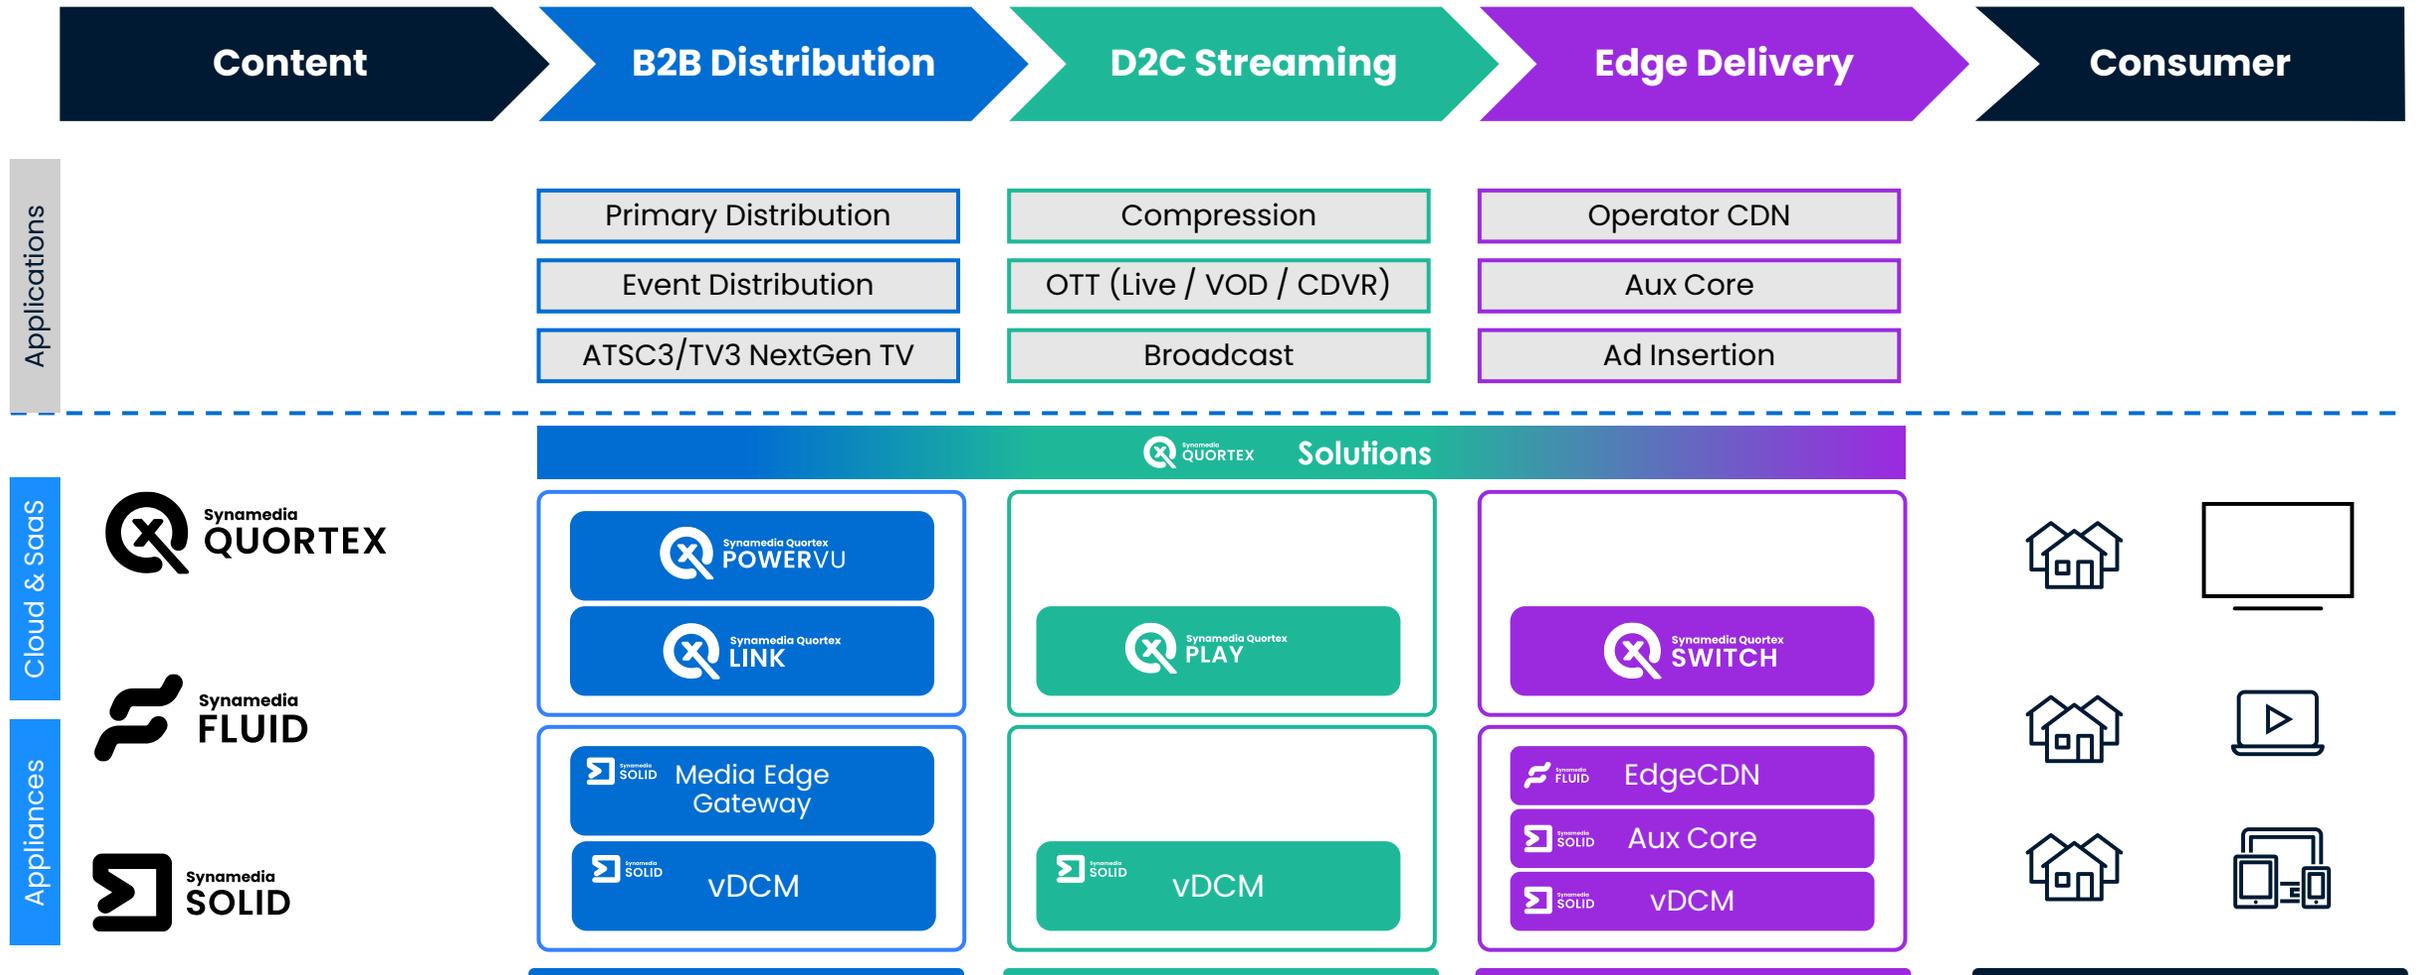

Helping You Embrace the Cloud, When and How it Makes Sense

Quortex Usage Fee Models

Pay-as-you-Go

Pay only for what you use with no upfront commitment

Best for: Flexibility & variable usage

E.g.: An operator experimenting a live OTT service with fluctuating demand
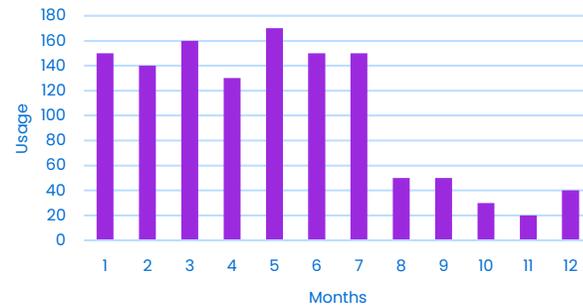

Monthly Recurring

Commit to a fixed monthly spend in exchange for discounted rates

Best for: Predictable, 24/7 usage

E.g.: A broadcaster with a steady schedule of channels to distribute monthly

Prepaid NEW*

Commit and Pay in advance for a set amount of usage or service

Best for: Usage over a period/season

E.g.: A sports streamer with a pretty well-known number of games per seasons
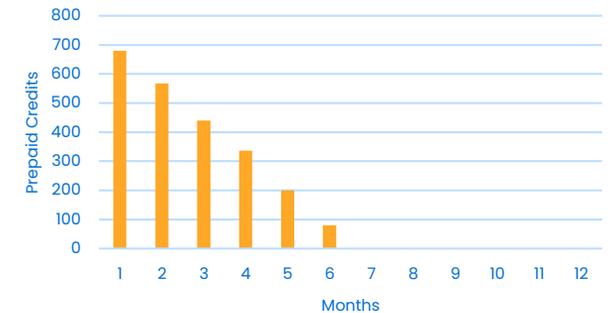

Quortex Pricing at a Glance

Pricing Type	Onboarding fee	Platform fee	Usage fee		Service Level Fee

The Quortex Technology

Technology behind the brand – key concepts and differentiators

Quortex Components
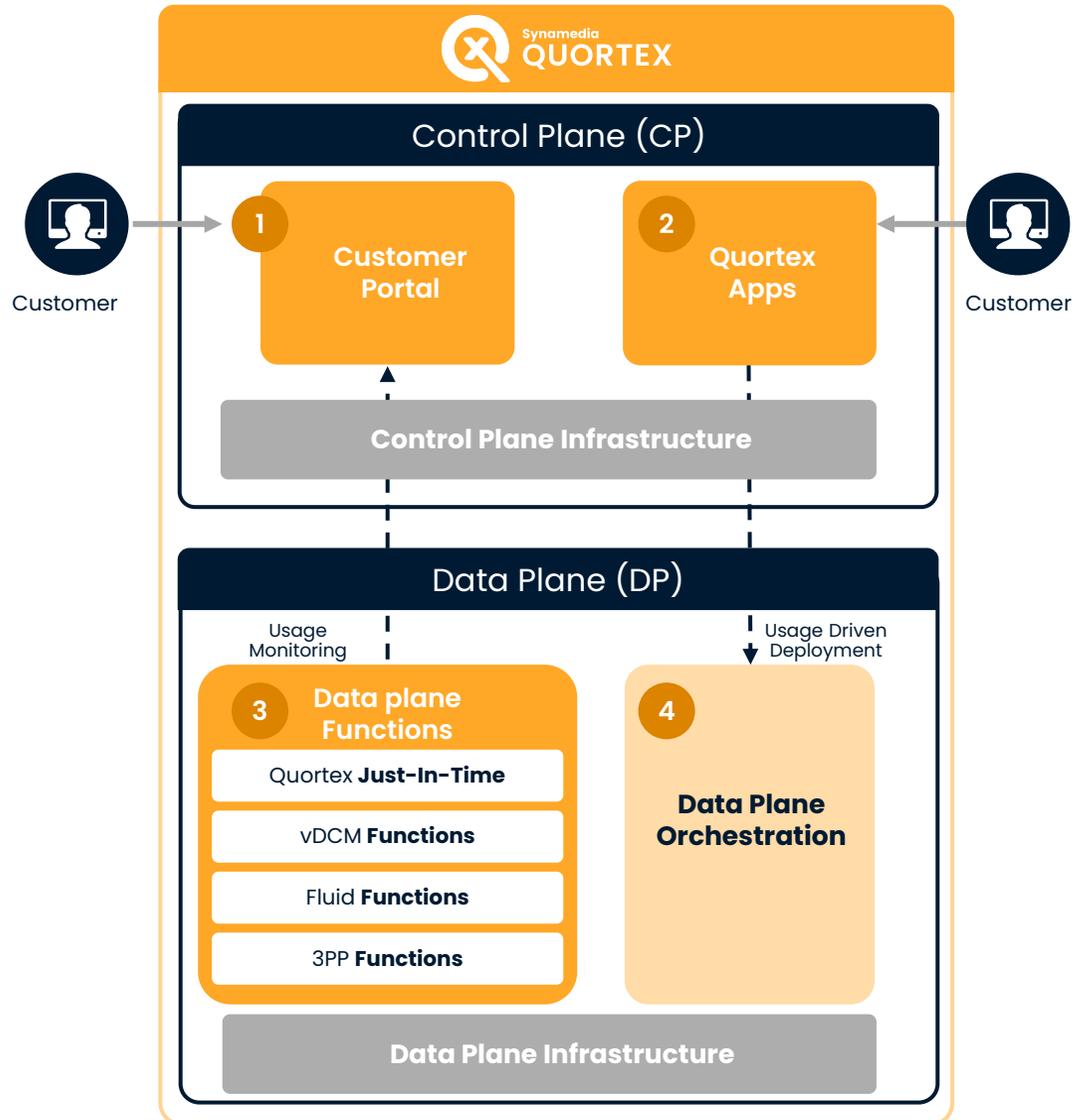

Control Plane (CP)

1 **Customer Portal**
- Manages accounts, tracks usage, billing, accesses support…

2 **Quortex Apps**
- Provides application specific functionality
- Prepackaged Product/Blueprints: Quortex Link, Quortex Play, Quortex PowerVu & Quortex Switch
- Full-featured API with a self-service easy to use UX on top

Data Plane (DP)

3 **Data Plane Functions**
- Cloud native software based on docker containers and microservices
- Video functions powered by vDCM, PowerVu and Fluid EdgeCDN
- Video processing from ingest of source content to delivery to consumers
- Agile extendible platform to easily onboard new or 3rd party functionality
- Provides multiple levels of resiliency and availability up to 5 x 9's

4 **Data Plane Orchestration**
- Deployment in public cloud, private cloud, on-prem or hybrid
- Orchestrates and scales cloud resources up and down on usage
- Provides smart self-healing solutions

No marketplace when customer hosts and in this
case customer gets his cloud pricing

Optional: VN managed service

Deployment Options & Value

## Cost, Control & Speed Trade-Offs

- The more control required over infrastructure and environment, the more customization, onboarding effort, and support complexity which reflects in both pricing and deployment timelines
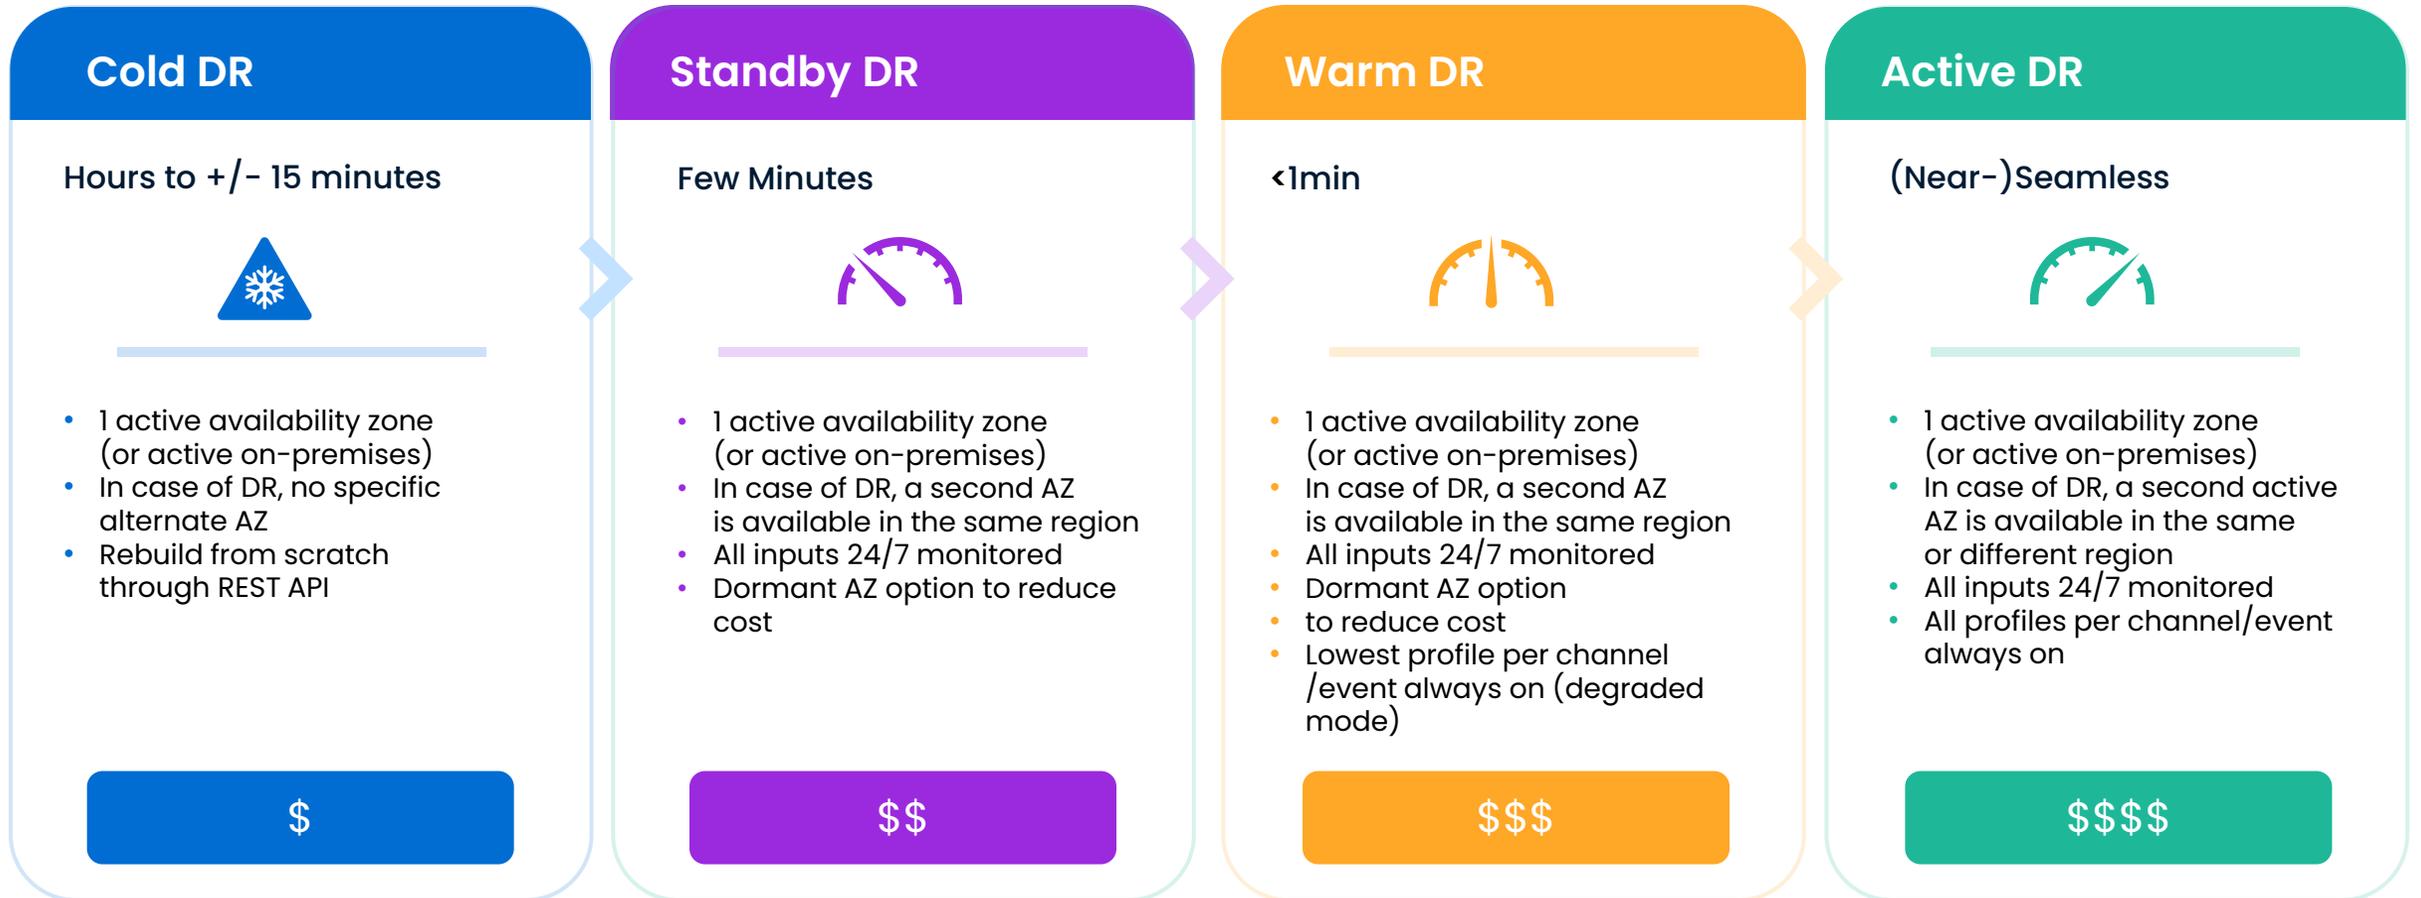

Highest control, highest complexity
Slower onboarding & upgrades
slower benefit from innovation,
More customer-specific support

More isolation and control
good middle ground with some
delay in upgrades.

Fastest deployment
& upgrades
Effortless lowest TCO

Feature	Product	Blueprint	Solution
Best For	Simplicity, speed	Isolation, compliance	Control, data residency, 3PP integration
Deployment Model	Multi-Tenant SaaS	Single-Tenant SaaS	"Private" SaaS
Hosting	Synamedia	Synamedia	Synamedia or Customer
Infrastructure Cost	Included (shared)	Included (dedicated)	Customer pays if his cloud / account
Typical Subscription Fee	$	$$$	$$$$$
Onboarding Time	⚡ Instant	⏱ Days	🛠 Weeks to Months
Upgrades & Patching	✅ Automatic, zero-effort	⚠️ Scheduled by us	❌ Manual, customer-assisted
SLAs & Support	✅ Included	✅ Optional Tiers	⚠️ Premium, complex
Speed to Value	🟢 Fastest	🟡 Medium	🔴 Slowest
Contract Approach	Click & Accept	Synamedia MSA + Order Form	Custom Contract (SOW, MSA)

Quortex Resiliency

Key concepts and considerations

Customer Needs

Service Level Agreement	**Resiliency Aspects**	**Cost / Spend**
Uncommitted	Single or Multiple Availability Zone	Active or Dormant Availability Zone
Few hours / year	Single or multiple regions	Single or multiple regions
1 hour / year	Load Balancing in Multi-CDN	
5 mins / year	Single Channel Fault Domain	

Metrics

Cold DR	Standby DR	Warm DR	Active/Active DR

DR modes, deployed as hybrid or fully in the cloud, Customer, back-office and/or CloudOps triggered

Customers/Partners
Self-service
Customer Cloud operations

Synamedia CloudOps
Full-service
Pro-active Cloud operations

Quortex Resiliency

Cold DR

Hours to +/- 15 minutes

- 1 active availability zone (or active on-premises)
- In case of DR, no specific alternate AZ
- Rebuild from scratch through REST API

$

Standby DR

Few Minutes

- 1 active availability zone (or active on-premises)
- In case of DR, a second AZ is available in the same region
- All inputs 24/7 monitored
- Dormant AZ option to reduce cost

$$

Warm DR

<1min

- 1 active availability zone (or active on-premises)
- In case of DR, a second AZ is available in the same region
- All inputs 24/7 monitored
- Dormant AZ option to reduce cost
- Lowest profile per channel /event always on (degraded mode)

$$$

Active DR

(Near-)Seamless

- 1 active availability zone (or active on-premises)
- In case of DR, a second active AZ is available in the same or different region
- All inputs 24/7 monitored
- All profiles per channel/event always on

$$$$

Customer Hybrid combination depending on channel value possible!

Quortex Security Levels

Company -wide Security Practices

InfoSec & IT security teams:
dedicated teams in Synamedia ensuring security awareness, monitoring & operations

Secure software development lifecycle process:
threat modeling, design review, security best practices, compliances guidelines and regulations like GDPR, open source code tracking & compliance enforcement, vulnerability scanning...

Security Awareness personel:
mandatory trainings

SaaS Development

Design for security from day one:
use secure coding practices, threat modelling, and role-based access.

Protect data and systems:
encrypt at rest/in transit, enforce MFA, and secure APIs with rate limits and validation

Automate & monitor:
integrate security in CI/CD, scan dependencies, and log for anomalies and response

Cloud Deployment & Operations

Tenant Isolation:
Physical/logical separation (VPCs, accounts), private subnets...

Harden infrastructure and deploy securely:
automate with IaC, monitor configurations, and minimize exposure.

Detect and respond fast:
centralize logging, enable real-time alerts, and maintain tested incident playbooks.

Content Security

Digital Rights Management (DRM):
Industry-standard encryption and license management (e.g., Widevine, FairPlay, PlayReady).

Forensic Watermarking:
Unique session-level identifiers to trace leaks and enforce accountability.

Secure Transport:
HTTPS, secure CDNs, IP firewall, EAS encryption...

Value Proposition

Why Quortex?

Focus on Productivity

Focus workforce on core business, offload maintenance and monitoring to tech vendor

Cost Optimized

Dynamic scalability to manage elastic workloads

Business Agility

Fast Launch, Continuous Innovations, Global Reach and Proactive Expert Services

Solution Oriented

Frictionless enablement of SaaS Workflows in customer cloud & operational environments

OTT Commercial Flexibility

Usage-based consumption models tailored at the financial needs of the customer

Synamedia
QUORTEX

Quortex ROI Examples

Transition from on-prem to SaaS
Save 10% for a 100 channel OTT headend
in 1+1 redundancy

**Disaster Recovery
Business Case**
No more always-on costs — launch cloud
resources when needed and scale with
channel worth e.g for sports games

Long Tail Just-in-Time
Only Stream demanded profiles
using spot instances can save up
to 75% cloud costs

Transition from Satellite to CDN
Save up to 50% opex by migrating to CDN
distribution to your affiliates with the extra
incentive to personalize/regionalize

**Compression
to cut CDN Opex**
Our exceptional Compression Efficiency
can save up to 40% of your CDN Costs!

Smart Content Switching on CDN
Maximize CDN efficiency with a single-digit percentage of your savings
— optimized by region, peaks, and provider deals

Synamedia
QUORTEX

Real World

Examples

Quortex Use Cases

B2B Distribution

Distribute premium content globally to affiliates and virtual MVPDs over satellite, IP and cloud.

Channel Origination

Generate dedicated linear channels for each affiliate with specific schedules and regionalization

Live Events

Distribute, personalize and deliver sports and live events at scale

**Content Steering**

multi-CDN orchestration made simple to optimize streaming costs, quality of experience and reliability

OTT Streaming

Streaming of Live, VOD, time-shift and recorded content at premium quality and lowest latency to any device

Monetization

Create new Value with Ad's and FAST

How Yes turned to SaaS DR: Zero Downtime for Premium Channels and Big-Time Cost Savings

Business Objective

- Phase out DTH satellite and move to all-IP by 2026.
- To be the world's first provider of a cloud-based, internet-only TV service with broadcast-equivalent latency – yes LIVE+.
- Disaster recovery solution at effective cost
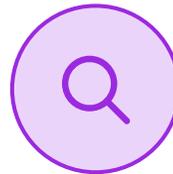

Approach

- Hybrid on-premises and cloud solution:: Solid vDCM based setup for Live, VOD and TSTV + Fluid EdgeCDN
- Disaster Recovery Solution with Quortex Play running on Synamedia cloud but in a dedicated Yes Cloud Account
- 21 premium channels with active DR, 160 with Warm DR
- Managed services for maximum support
- SOLUTION as this runs as a on-prem + cloud combination

Outcome

- End to end solution deployed
- Custom Yes dashboards as part of solution offer / price
- Migration of all channels to the cloud
- Extension to cDVR
- Extension to support VoD as managed service

"Only Synamedia offered an end-to-end solution able to meet all of our requirements, ensuring we avoided the need to integrate any third-party products,"

Itzhak Elyakim, Vice President of Engineering and CTO

Closing

Your Cloud Transition Partner

Why Synamedia Video Network?

Unrivaled Cost & Energy Efficiency
Just-in-time or round-the-clock cloud consumption
Most optimized compression codec
Hybrid & Multi-CDN Edge Strategy

Operational Agility
Self-Service SaaS
White-glove as-a-Service
M&C Suite for Customer Operations
World-class Professional & Support Services

Reliability is #1
Over 1000 deployed customers with 1M channels processed in real time, 30+ years experience

Monetization Flexibility
DAI, CDVR
Perpetual, Subscription
Pay-as-you-go
Commit Plan Options

Continuous Innovation
Just-in-time Cloud-native Tech
At Scale Low-Latency CDN (MOQ)
Peak offload and Open Caching
AI-driven Compression

30+ years Experience
